# One integrated platform to support all of your clinical trials, from start-up through close-out

Financial oversight. Risk management. Coordinator-and patient-centricity. Motivated clinical research leaders want increased financial visibility and strong operational oversight while supporting a coordinator and patient focus. These challenges provide opportunities to reimagine clinical research. What if you could gain operational efficiency and consistency plus interoperability across technologies?

Best-in-class integration can reduce the time that teams spend on multiple enterprise applications, ensuring a single source of truth for accurate, consistent information. WCG offers a solution that leads to accelerated research management with scalable growth and continuous improvement.

WCG eResearch is a comprehensive and adaptable clinical research management suite (CRMS) automating all administrative, financial and research activities. Clients – academic medical centers, hospitals and multi-center research networks – tell us they have improved clinical trial profitability an average of 20%.

**38%**
Increase in Study Starts

**44%**
Increase in Patient Enrollment

**37%**
Decrease in Start-Up Timelines

**29%**
Increase in Patient Retention

## WCG eResearch, on-premise or WCG-hosted, supports:

**Integrated Operations Across Technologies**

Providing information and reporting insights, enhancing visibility within the organization and increasing efficiency and consistency.

**Financial & Regulatory Oversight**

Evaluating study opportunities, ensuring fast turnaround for customer satisfaction and sponsor payment plus meeting compliance standards to manage risk, avoid penalties and support audits.

**Coordinator and Patient-Centricity**

Managing patients and visits (with a portal for remote patient engagement and self-reporting), overseeing numerous studies simultaneously plus eliminating duplicate data entry and interface with multiple, complex systems.

*WCG eResearch streamlines your clinical lifecycle while improving transparency and reporting. Ensure a single source of truth for coordinators as they access study documents and interface with EHRs and other enterprise systems. Your team will spend less time on administrative work and more time with patients, using intuitive, dependable software tools. For large programs, achieve systematic network management across all studies simultaneously.*

### Demonstrated Scalability

Supporting **77,000+** studies and **97,000+** users for one client

Supporting another client's **120** physical locations

## WCG eResearch helps optimize your research program

**80%** Reduction in data entry

**21%** Boost in financial results

**5x** Increase in productivity

**200+** System interfaces leveraged, including 50 with Epic alone

WCG has been a trusted partner in advancing clinical trial success for over 50 years. Our dedicated team and subject matter experts offer deep experience plus fresh insights to revolutionize clinical trials.
